

# Self-Service Degree Audit: Quick Guide for Students

1. Log into Self Service via **Connect2U** or directly at <https://selfservice.wne.edu>
2. Click on **Student Planning** tile.
3. Click on **Go to My Progress**. The **My Progress** area provides a detailed view of your academic program via a degree audit that shows both the degree requirements and the progress toward that degree.  
Includes:
  - **At A Glance** – A summary of GPA, major, credits taken and remaining, and program notes.
  - **View New Program** – Allows you to do a “What If” analysis to see what the requirements would be for a different academic program.
  - **Requirements** – Shows all degree requirements for the current program. Includes General University Requirements, College Core (if applicable), Major requirements and General Electives. Requirements will show as “Completed”, “In-Progress”, “Planned”, or “Not Started”. Showing the details of a requirement will allow you to search for courses from the catalog that meet that particular requirement and add them to Timeline
4. Expand a Requirement category by clicking **Show Details** to view courses still needed within that category.
5. Click on the **Search** button within a requirement to go to Catalog to list all courses that satisfy a particular requirement. Once in catalog, course(s) can be added to plan.
